

WL2836E

Low noise, High PSRR, High speed, CMOS LDO

<https://www.ovtivision-group.com/>

Descriptions

The WL2836E series is a high accuracy, low noise, high speed, high PSRR, low dropout CMOS Linear regulator with high ripple rejection. The devices offer a new level of cost effective performance in cellular phones, laptop and notebook computers, and other portable devices.

The WL2836E has the fold-back maximum output current which depends on the output voltage. So the current limit functions both as a short circuit protection and as an output current limiter.

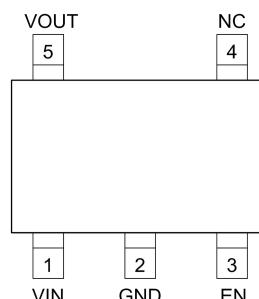

The WL2836E regulators are available in standard SOT-23-5L Package. Standard products are Pb-free and Halogen-free.
