Width (inches):	2
Shape:	Rectangle
Weight (pounds):	0.08765
Material Type: 	Vinyl
Material Color:	White
Printed Color:	Brown
Adhesive:	Permanent
Label Text:	CAL

Wrap-up™ Labels

Like **Coverall™** labels, **Wrap-up™** labels provide a convenient way to protect the information on your calibration labels. Wrap-up™ labels excel in situations where Coverall™ labels won't work. Use them on small cylindrical surfaces like gage or micrometer handles. They work very well on any narrow part of an instrument; they just need to wrap completely around the part until the clear tail covers the writing on the label.

The Wrap-up™ construction includes a calibration label with a clear tail that wraps around the part and covers the label section. These labels employ clear, flexible vinyl with permanent adhesive. In addition to the obvious benefit of protecting the written information on the label, Wrap-up™ labels wrap adhesive all the way around the part. In this way, they adhere tightly to the gage or instrument even when

subjected to constant handling.

- Available in 13 colors for color control of calibration interval
- For thimbles of micrometers and handles on other tools
- Clear section wraps around and protects you data from tampering, smearing, weather, chemicals, and abrasion
- 6" overall length (with cover)
