

DV CONNECTOR

Disconnectable Crimp style connectors

One position has a different pitch than the others. This provides the connector with polarization and prevents misinsertion.

Features

• Secure mounting

The housing lock feature secures the connector with the header, ensuring that a stable connection is maintained during vibration.

• Twin-beam contacts

Each contact has two wiping areas, ensuring a stable and reliable connection.

• Housing lances

The lances on the resilient housing ensure each insertion and secure locking of the contact into housing.
