ACTIVE WORLDWIDE.

The Wieland Group employs more than 2,000 people all around the globe. With some 15 locations and subsidiaries, and sales partners in more than 70 countries, the Wieland Holding is present in nearly all important key markets worldwide. Always with a clear commitment to the German location where most of the products are still manufactured.

The group makes us strong

The Wieland Holding is based in Bamberg, Bavaria, and comprises two independently acting subsidiaries: Wieland Electric and STOCKO Contact.

Groundbreaking innovations made Wieland Electric one of the leading suppliers of electrical connection technology. This company, founded in Bamberg in 1910, is the largest subsidiary of the Wieland Holding.

STOCKO Contact is based in Wuppertal and joined the Wieland Group in 2001. Stocko has also more than 100 years of company history to its credit and is one of the greatest manufacturers of connector systems and crimp contacts.

Established in industries

Control cabinet engineering, industrial automation, building system technology – our large product portfolio provides solutions for all kinds of applications.

From innovative interface and network technology to terminal blocks to „safety first" – with modular system solutions and safety components. With Wieland products in your control cabinet, you are always on the safe side.

Energy bus systems for distributed automation or indoor and outdoor field bus components – Wieland technology can be found everywhere, and in all kinds of applications.

In building system technology, Wieland Electric is the world market leader in pluggable eletrical installation.

There are good reasons why our system solutions can be found in the most spectacular building projects worldwide. When it comes to electronic networking, Wieland leads the way to the "intelligent house".

Welcome Future

Wieland Electric is 100 years young, and full of innovative energy. And our commitment for the future is not only to find constantly new system solutions for our customers but also social responsibility.

Environmentally friendly high-tech products, manufactured to the latest production standards, an audited environmental management system and substantial investments in our locations are all part to this concept.

Global commitment and sustainable regional action – Wieland Electric is fit for the future: Contacts are green.

CONTENTS

ICE

The *revos* program
An overview of heavy duty connectors

Heavy duty connectors are specifically designed for use in especially tough environment conditions. The main areas of use are the automotive industry, in packaging machinery and equipment, as well as for instrumentation, control and automation equipment.

They permit simple and time-saving installation of machinery and equipment. Their housings protect against mechanical impact and prevent entry of spray water and dust. The system's sub-assemblies can undergo a quality check in house, which simplifies installation and commissioning at their end use location.

Overview of the industrial multipole connector range *revos*

Contact inserts:

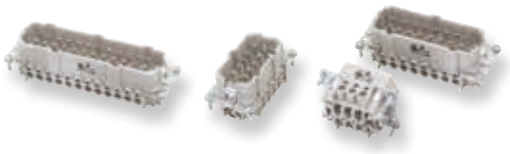
revos MINI

The contact inserts for the ***revos*** MINI connector series are very compact and available with 3 to 12 poles.

You will find the contact inserts for the ***revos*** MINI connectors on pages 28-31.

---

revos BASIC

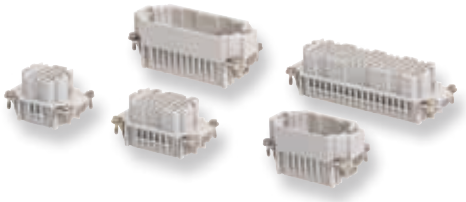


The proven connectors and multipole adapters are available in 6 to 92 pole design with screw, spring clamp and crimp connection technology.

You will find ***revos*** BASIC contact inserts on pages 32–57; You can find terminal block adapters and inserts with integral cable strain relief on pages 78–91.

---

revos DD



High contact density in the most compact space – this is what the space-saving contact inserts of ***revos*** DD offer. The inserts fit into the BASIC housing sizes 6/6H, 10/10H, 16/16H, 24/24H. Connection is made with the proven turned crimp contacts, with a diameter of Ø 1.6 mm, which offer a connection range from 0.14 to 2.5 mm^2 at a rated voltage of 250 V (600 V CSA/UL).

You will find ***revos*** DD contact inserts on pages 58–59.

---

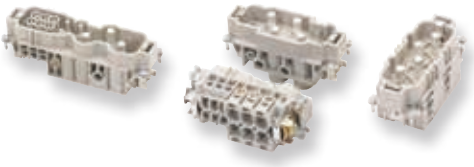
revos HD

Contact inserts and multipole adapters with 15 to 64 poles and for currents up to 10 A designed according to DIN EN 175301-801 (previously DIN 46352). The contact inserts are designed in crimp connection technology.

You will find ***revos*** HD contact inserts on pages 60–67 and terminal block adapters on pages 92–95.

---

revos POWER

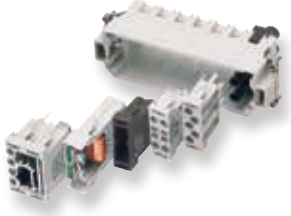


The contact inserts and multipole adapters are designed for >16 A currents; they are also available with mixed contacts and screw connection.

You will find ***revos*** POWER contact inserts and terminal block adapters on pages 68–77.

---

revos FLEX



The modular system for the economical and clever mixture of contact inserts. With this flexible system you can customize your connector, to meet the requirements of your application.

You will find ***revos*** FLEX contact inserts on pages 100–113.

Housing families:

revos MINI

The design of the housings for the connectors of **revos** MINI is very compact and available in two materials:

- Die cast zinc alloy
- Polyamide

You will find **revos** MINI-housings on pages 118–119.

---

revos BASIC

PG threads are available on request!

The housing of the BASIC series are available in size 6 to 48. For convenient connection of the cables this series is also available with enlarged cable entry in increased height design in sizes 6H–24H. The housings are made of die cast aluminum with, silicon-free finish.

You will find **revos** BASIC-housings on pages 120–223.

---

revos HD

PG threads are available on request!

The housings of the HD series are available in size 10/15 to 32/50.

You will find **revos** HD-housings on pages 224–237.

Special multipole connector designs:

revos Ex

revos Ex multipole connectors are designed for special applications in hazardous areas. Their use in zone 1 for intrinsic circuits has been approved by the BVS test institute. The housings for the multipole connectors are manufactured from die cast zinc alloy.

You will find **revos** Ex-contact inserts on pages 98–99.

You will find **revos** Ex-housings on pages 238–257.

Operating instructions for Ex plug connectors, see facts&DATA.

---

revos IT

Data cable feed-throughs – the ideal solution for the installation of pre-assembled cables to enclosures. Sealed and with strain relief. Inserts with D-Sub connectors 9 to 100 pole.

You will find **revos** IT products on pages 96–97.

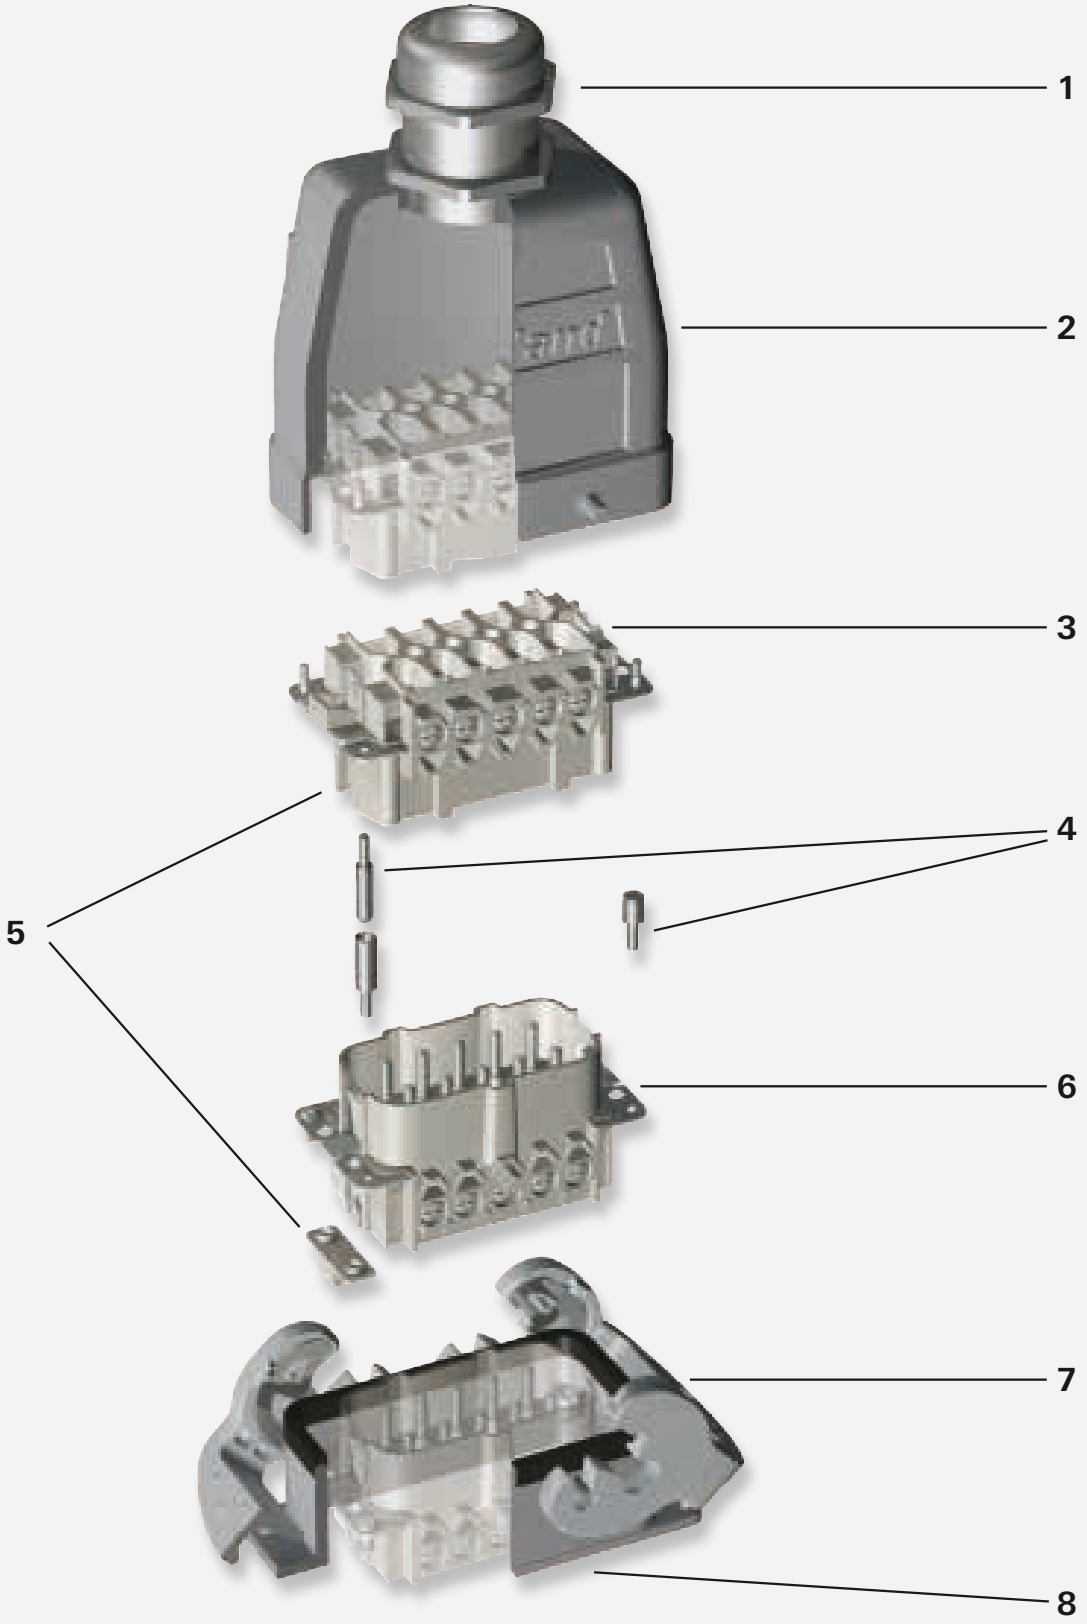
---

revos MOT

revos MOT plug connectors with plastic housings, simple and easy handling due to its unique latching system.

You will find **revos** MOT products on pages 114–115.

General design of a *revos* industrial multipole connectors



1. Cable glands

For ***revos*** industrial connectors the following cable glands are available:

- Cable gland without strain relief, protection degree IP54, 7x.xxx.xxxx.0 fully assembled
- Cable glands, protection degree IP68, available as accessories in plastic or brass
- EMC cable glands

2. Hoods

Aluminum die cast alloy, silicon-free finish (housings for ***revos*** Ex- and ***revos*** MINI are manufactured from die cast zinc alloy)

- Low and increased height designs available
- Cable entry at the side, on top or at the front
- With or without locking levers

3. Female inserts

Available in the following connection techniques:

- Screw connection
- Spring clamp connection
- Crimp connection

4. Coding accessories

Coding pins, female coding pieces and coding bolts

5. Coding bolts

Coding pieces are used for coding 690 V contact inserts. In the 690 V housings the coding ribs are removed and insulating tape is attached inside the housing in order ensure the creepage distances and clearances to live parts. This mechanical coding prevents the 690 V contact inserts from being mounted in 500 V housings.

6. Male inserts

Available in the following connection techniques:

- Screw connection
- Spring clamp connection
- Crimp connection

7. Locking levers

Single or double locking lever in plastic, steel or stainless steel design.

8. Bases

Aluminum die cast alloy, silicon-free finish (housings for (***revos*** Ex- und ***revos*** MINI are manufactured from die cast zinc alloy)

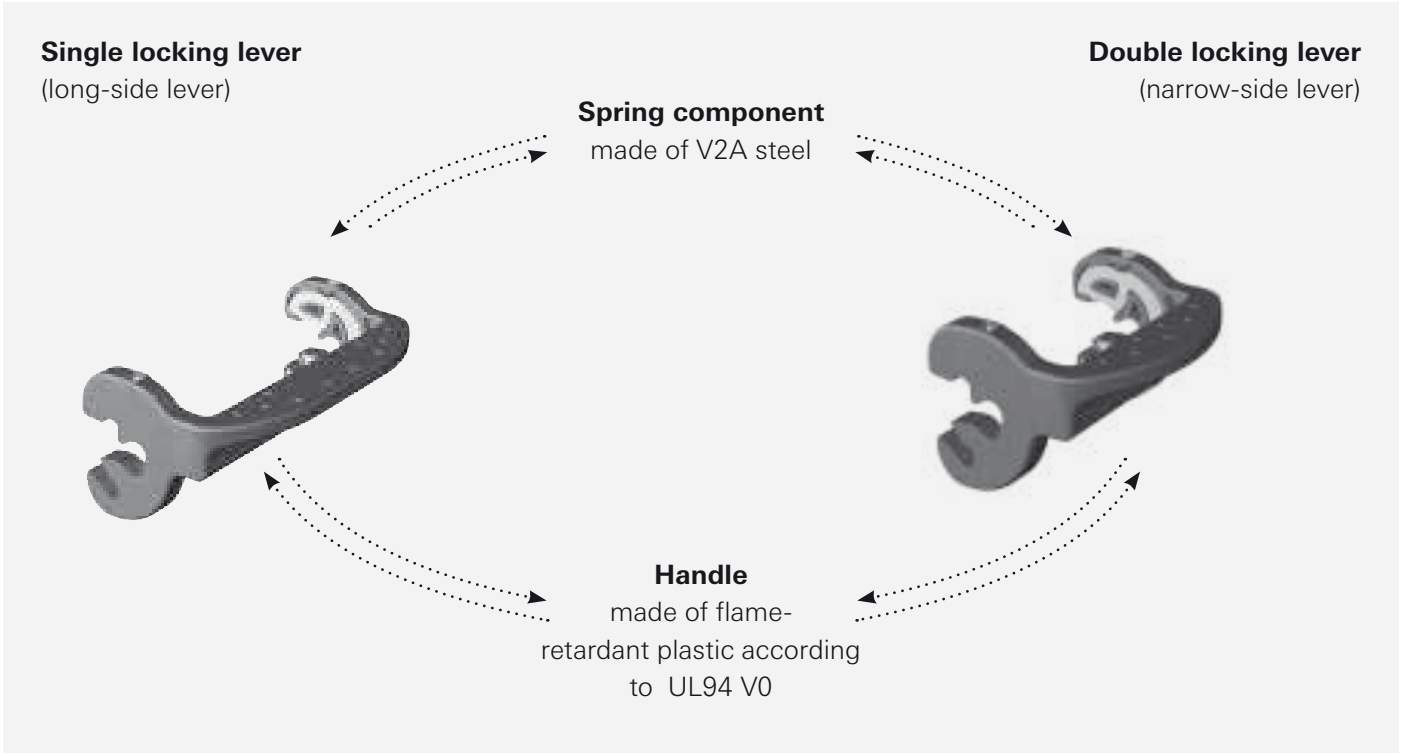
- Low and increased height designs available
- Open-bottom and closed-bottom bases
- Single or double locking lever of plastic, steel or stainless steel
- Coupling for “cable-to-cable connections”

The locking mechanism of the *revos* BASIC industrial multipole connectors

The locking levers secure the mechanical connection between hood and housing. The locking mechanism is also a main determinant of the connector's IP protection rating. Wieland's standard ***revos*** BASIC connectors in size 6 to 24 are equipped with locking levers that are made of two components.
The handle consists of flame-retardant and halogen-free plastic material and ensures convenient and almost wear-free locking. The retention force is provided by a spring component that is made of V2A stainless steel and also resists aggressive environmental conditions.

Locking features:

- Low-wear locking mechanism
- High holding forces
- Plastic material suitable for outdoor applications
- Salt and seawater resistant, UV resistant
- During overhead mounting the lever will remain in the open position
- Replaceable
- Self-extinguishing plastic material according to UL 94 V0



In general we distinguish levers on the hood and levers on the base, as well as single locking levers (on the long side) and double locking levers (on the narrow side).

On the opposite hood or base there are studs to which the lever latches.

The following lock types are available:

One long-side lever
(single locking lever)

Two narrow-side levers
(double locking lever)

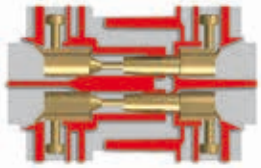
Connectors for cable-to-cable couplings:

One long-side lever
(single locking lever)

Two narrow-side levers
(double locking lever)

Locking levers made of steel or stainless steel are available on request.
In case of any questions our connector hotline (+49 951/9324-997) will be happy to assist you.

Connection technologies



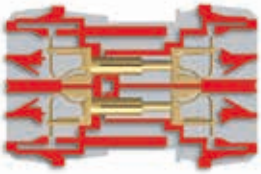
Screw connection technology:

This connection technology is the one most frequently used today. Screw connectors are designed according to EN 60 999/VDE 0609.

Features of this connection technology:

- Operation is simple and easy
- No special tools required
- High-quality connection that can be used for all areas of application
- Non-permanent connection, rewiring possible

The contact point can be delivered with or without wire protection.
Clamping bodies with wire protection do not require any preparation of the wires.
Clamping bodies without wire protection require appropriate preparation of the wires in case fine-stranded wires are used.



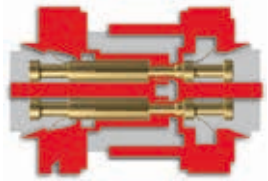
Spring clamp connection technology:

In the last few years this connection technology has been established as an industrial standard. Spring clamp connectors are designed according to EN 60 999/VDE 0609.

Features of this connection technology:

- Easy handling
- No special tools required
- High-quality connection even under vibration
- Non-permanent connection, rewiring possible

For contact inserts with spring clamp connection technology all wire types (solid, stranded, fine-stranded) can be used without special preparation of the wires.
When ferrules are used they must be crimped to the wire by means of a special positively driven crimping tool.



Crimp connection technology:

This connection technology provides the highest quality, but is also the most demanding. The technical requirements for crimp connections are defined in the IEC 60 352-2 standard. Crimp connections must always be produced using a crimping tool that has been designed for the contact. Wieland crimping tools are specifically adapted to the contacts and thus ensure a permanent and corrosion-resistant connection.

Features of this connection technology:

- High-quality connection similar to cold welding
- Consistant repeatability of the crimp connection
- Suitable for automation during pre-assembly of cable harnesses
- Compact design that allows a high contact density
- Special crimping tool required
- Permanent connection

Screw connection technology:

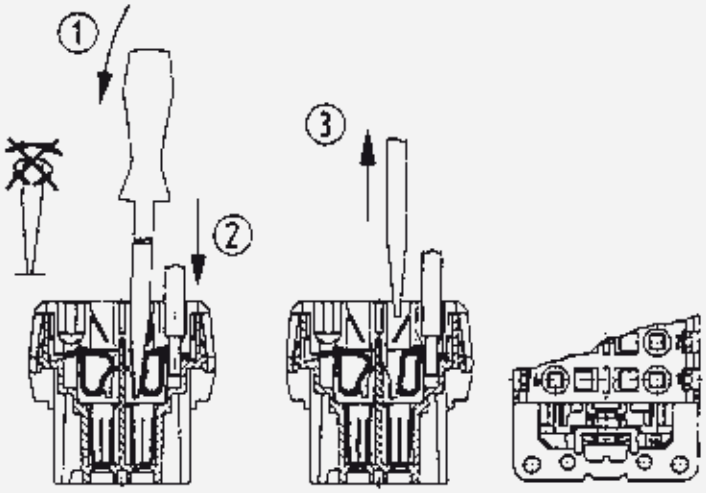
Screw terminals are measured in accordance with EN 60 999/VDE 0609.
Please refer to the respective tightening torques from table 4 on page 287.

Spring clamp connection technology:

Operating instructions:

1. Insert the screwdriver using a slight curving motion into the rectangular opening.
2. Open the clamping body.
   The screwdriver will stay in position, and hold the clamping body open.
3. Insert the wire into the round wire entry guide and remove the screwdriver.

Screwdriver: 0.6 mm x 3.5 mm
Part number: 06.502.4000.0



Crimp connection technology:

Using the suitable tools when producing crimp connections is essential. Correct and gas-tight connections can only be ensured by tools that are particularly adapted to the contact.
Wieland crimping tools compress the contact point with a so-called B crimp or a square crimp to make it gas-tight.

A contact to tool assignment can be found on page 295.

Micrograph of a B crimp

Micrograph of a square crimp

Contact materials:
revos-connectors are available with tin-plated, silver-plated or gold-plated contacts.
The basic material is a high-quality copper alloy.
For exact explanations, see pages 296–297.

Product matrix

The ***revos*** product matrix provides an overview of the available families of contact inserts and their matching housing series. Horizontally you can find the contact inserts sorted per family and with indications for rated voltage, rated current and connection technology. Vertically the housing series and their variations in size are shown. Matching combinations are found in the matrix.

The restrictions of the ***revos*** FLEX and ***revos*** HD contact inserts are caused by their depth and cable density inside the housing when fully equipped with contact inserts. In case of any questions regarding these combinations, our connector hotline (+49 951 9324-991) will be happy to assist you.

revos contact inserts offer many possibilities

The task of the contact inserts is distribution of power and signals. The contact inserts are available in 2- to 216-pin design. They are suitable for current from 4 to 100 A and voltages up to 5.5 kV.

revos MINI - Their especially compact design allows them to fit in applications for machine, control and switching systems, or also in small motors and lighting equipment, and also serve as classic contact inserts for industrial heavy duty connectors.
The contact inserts are available in 6 to 92-pin design.
revos BASIC is able to meet the toughest demands and so is used, for example, in the automotive industry, the machinery and equipment industry, in conveyor systems and in measurement and control technology.

Trigger action frame *revos* BASIC

The trigger action frames of the ***revos*** BASIC family are an economical option for implementing a pluggable feed-through connection for low-voltage switching systems. They can also be used as a cable-to-cable coupling that is mounted on a DIN rail TS35 according to DIN EN 50022 in a control cabinet.

The connection provides protection degree IP20.

The mounting application may influence the air and creepage distances and thus the rated voltage.

● **pluggable**
○ **not pluggable**

The system has the following advantages:

- Reduction of material and mounting costs
- Easy accessibility to the connector for testing purposes
- Simple and trouble-free maintenance
- Marking options with Wieland's marking system

Technical data	
Rated voltage	500 V
Rated voltage according to UL/CSA	600 V
Rated impulse voltage	6 kV
Rated current	16 A
Degree of pollution	3
Rated cross section	
EN 60999	0.5 – 4 mm²
UL	20 – 12 AWG
CSA	20 – 12 AWG
Contacts	
Material	Copper alloy
Surface	Sn
Insulation strip length	12 mm
Contact resistance	≤ 3 mΩ
Mating cycles	200
Screws head design / recomm. torque	
Mounting screws	H1 / 0.5 – 0.7 Nm
Clamping screws	M3 / 0.5 – 0.7 Nm
Ground conductor screws	H2 / 1.2 – 1.6 Nm
Temperature range	-40 – +120 °C

Description	Type	Part No.	P.U.
Accessories			
Universal foot	23 mm wide	05.583.0053.0	50

The mounting application may influence the air and creepage distances and thus the rated voltage.

Special conditions for safe use:

1. The heavy duty connectors must be attached to a device in such a way that a minimum protection rating of IP54 is maintained in accordance with EN 60529.
2. The heavy duty connectors can be used in an ambient temperature ranges from -20 °C to +60 °C.

Female insert	FLE BUD 2S 1.5 03 AU	78.181.0453.0	5

Technical data	
Rated voltage	30 V
Rated voltage according to UL/CSA	-
Conductor cross section	
USB module	0.8 – 1.5 mm² / 28 – 16 AWG
Profibus module	according to PROFIBUS DP regulations
Rated current	1 A
Number of poles	
USB module	4+screen
Profibus module	2+screen
Connection torques screen / PCB connector	0.5 Nm / 0.2 Nm
Data transmission rate	
USB module	12 MBit/s
Profibus module	1.5 MBit/s
Insulating material	Polycarbonate
Flammability class of insulating housing	UL 94 V-0
Temperature range	-20 – +85 °C

revos housing components – simply, safely protected

The ***revos*** housing components for heavy duty connectors consist of high-quality aluminum and zinc die casting. Wieland has designed the housings to be corrosion-resistant, water and dust tight, and usable under the toughest environmental conditions.

Note:
In 2013 the design of the revos housings will change. Through the use of an integrated insulation strip, voltage ranges of up to 690 V can then be covered. Additionally, a new, flexible marking system will be available to you.

Technical data	
Material	Die cast aluminum alloy
Surface	silicon-free
Locking levers	Handle: Polyamide, UL94-V0; stainless steel: V2A
Gasket	NBR
Degree of protection	
with latched locking levers	IP54
with appropriate cable glands	IP65
Temperature range	-40 – +120 °C

Description	Type	M	Part No.	P.U.
Accessories				
Cable gland IP68, plastic material, gray	Connection range 6 – 12 mm	20	Z5.507.1353.0	10
Cable gland IP68, nickel-plated brass	Connection range 8 – 13 mm	20	Z5.507.1321.0	10
Cable gland IP68, plastic material, gray	Connection range 7 – 16 mm	25	Z5.507.1553.0	10
Cable gland IP68, nickel-plated brass	Connection range 11 – 18 mm	25	Z5.507.1521.0	10
Contact inserts				
See the product matrix			Page 24–25	

All Bases on this page are also available in M25 design.
The fifth digit of the part number always increases by 4 for M25 compared to the corresponding M20 designs.
Example:
71.34**1**.1035.0 for M20 becomes 71.34**5**.1035.0 for M25

Note:
In 2013 the design of the revos housings will change. Through the use of an integrated insulation strip, voltage ranges of up to 690 V can then be covered. Additionally, a new, flexible marking system will be available to you.

Technical data	
Material	Die cast aluminum alloy
Surface	silicon-free
Locking levers	Handle: Polyamide, UL94-V0; stainless steel: V2A
Gasket	NBR
Degree of protection	
with latched locking levers	IP54
with appropriate cable glands	IP65
Temperature range	-40 – +120 °C

Description	Type	M	Part No.	P.U.
Accessories				
Cable gland IP68, plastic material, gray	Connection range 6 – 12 mm	20	Z5.507.1353.0	10
Cable gland IP68, nickel-plated brass	Connection range 8 – 13 mm	20	Z5.507.1321.0	10
Cable gland IP68, plastic material, gray	Connection range 7 – 16 mm	25	Z5.507.1553.0	10
Cable gland IP68, nickel-plated brass	Connection range 11 – 18 mm	25	Z5.507.1521.0	10
Contact inserts				
See the product matrix			Page 24–25	

All Bases on this page are also available in M25 design.
The fifth digit of the part number always increases by 4 for M25 compared to the corresponding M20 designs.
Example:
70.34**1**.1035.0 for M20 becomes 70.34**5**.0635.0 for M25

Note:
In 2013 the design of the revos housings will change. Through the use of an integrated insulation strip, voltage ranges of up to 690 V can then be covered. Additionally, a new, flexible marking system will be available to you.

Note:
In 2013 the design and order numbers of the revos housings will change, but the function of the housings will remain intact. In addition, a new flexible marking system will be available to you. In the transition phase you can continue to order with the existing part number. You can find more detailed information and a cross-reference list in our e-Shop and on our homepage.

Contact inserts				
See the product matrix			Page 24–25	

All Bases on this page are also available in M25 design.
The fifth digit of the part number always increases by 4 for M25 compared to the corresponding M20 designs.
Example:
72.33**1**.1035.0 for M20 becomes 72.33**5**.1035.0 for M25

Note:
In 2013 the design and order numbers of the revos housings will change, but the function of the housings will remain intact. In addition, a new flexible marking system will be available to you. In the transition phase you can continue to order with the existing part number. You can find more detailed information and a cross-reference list in our e-Shop and on our homepage.

Technical data	
Material	Die cast aluminum alloy
Surface	silicon-free
Locking levers	Handle: Polyamide, UL94-V0; stainless steel: V2A
Gasket	NBR
Degree of protection	
with latched locking levers	IP54
with appropriate cable glands	IP65
Temperature range	-40 – +120 °C

All Bases on this page are also available in M40 design.
Part numbers available on request.

Note: In 2013 the housing will be equipped with an insulation strip. With this modification, voltage ranges of up to 690 V can be covered.

Note:
In the course of 2013, the design and order number of the housing will change. But the function of the housing will, of course, remain intact. Additionally, a new, flexible marking system will be available to you. In the transition phase, you can continue to order with the existing number. You can find more exact information and cross-reference lists in our e-Shop and on our homepage.

Technical data	
Material	Die cast zinc alloy
Surface	silicon-free, light blue
Locking levers	zinc-plated steel
Gasket	NBR
Degree of protection	
with latched locking levers	IP54
with appropriate cable glands	IP65
Temperature range	-20 – +60 °C

Contact inserts	
See the product matrix	Page 24–25

Special conditions for safe use:

1. The heavy duty connectors must be attached to a device in such a way that a minumum protection rating of IP54 is maintained in accordance with EN 60529.
2. The plug connectors can be used in an ambient temperature ranges of -20 °C to +60 °C.

See section “facts & DATA” for handling and assembly of the multipole connectors.

Technical data	
Material	Die cast zinc alloy
Surface	silicon-free, light blue
Locking levers	zinc-plated steel
Gasket	NBR
Degree of protection	
with latched locking levers	IP54
with appropriate cable glands	IP65
Temperature range	-20 – +60 °C

Contact inserts	
See the product matrix	Page 24–25

Special conditions for safe use:

1. The heavy duty connectors must be attached to a device in such a way that a minumum protection rating of IP54 is maintained in accordance with EN 60529.
2. The plug connectors can be used in an ambient temperature ranges of -20 °C to +60 °C.

See section “facts & DATA” for handling and assembly of the multipole connectors.

See the product matrix	Page 24–25

Special conditions for safe use:

1. The heavy duty connectors must be attached to a device in such a way that a minumum protection rating of IP54 is maintained in accordance with EN 60529.
2. The plug connectors can be used in an ambient temperature ranges of -20 °C to +60 °C.

See section “facts & DATA” for handling and assembly of the multipole connectors.

Accessories

revos accessories – all that you need

We offer a wide range of accessories in our portfolio of heavy duty connectors, such as DIN rail mounting frames, knock-out cover plates, coding pins, cable glands, covers for our housings, labeling accessories, and the related tools.

Mounting frames for *revos* contact inserts

The mounting frames of the ***revos*** BASIC family are ideal for use in low-voltage switching systems. They are mounted directly to the 35x15 DIN rail according to DIN EN 50022 inside the control cabinet. Use of the DIN rail mounting frame on a 7.5 mm high DIN-rail 35 x 7.5 in accordance with DIN EN 50022 is only possible if the installation space behind it is free.

The system has the following advantages:

- Reduction of material and mounting costs
- Simple and trouble-free installation
- Wire harness assemblies possible
- Easy troubleshooting with hinged top that enables access to the back of the connector.
- Re-wiring is possible without disconnecting.

The robust contact inserts of the ***revos*** family in use worldwide are used for this purpose.
The following contact inserts are available:

- ***revos*** BASIC
  Size 6, 10,16, 24
- ***revos*** POWER
  Size 16, 24
- ***revos*** HD
  40- and 64-pole
- ***revos*** FLEX
  Size 6, 10, 16, 24
- ***revos*** BASIC EE
  Size 6, 10, 16, 24
- ***revos*** DD
  Size 6, 10, 16, 24

Degree of protection	IP65
Flammability	UL94-V0

revos reducer plate adapt the cut-outs of size 24 to sizes 6, 10 or 16.

Coding of *revos* multipole connectors

Each family of contact inserts has its unique design. Mismating of the different families' contact inserts is therefore impossible due to the design. However, if several connectors or the same size and family are mounted directly adjacent to one another, mismating may occur during start-up of the machine or system.

In order to avoid mismating we developed coding bolts, coding pins and female coding pieces that are to be assembled instead of the regular mounting screws of the contact inserts. Six different codings can be achieved when coding bolts are used.

Coding bolts of version A
Suitable for the following
contact inserts / multipole adapters:

- ***revos*** BASIC
- ***revos*** POWER
- ***revos*** HD
- ***revos*** FLEX
- ***revos*** Ex

that are mounted to the housing at the **front**.

Suitable for:

- Screw termination inserts with part numbers:
  70.2XX.XXXX.X
  70.3XX.XXXX.X
  70.4XX.XXXX.X
  72.2XX.XXXX.X
  72.3XX.XXXX.X
- Crimp termination inserts with part numbers:
  70.7XX.XXXX.X
  72.7XX.XXXX.X
  73.7XX.XXXX.X
- Spring clamp termination inserts with part numbers:
  70.5XX.XXXX.X
- Terminal block adapter inserts (mountable from the front) with part numbers:
  70.7XX.XXXX.X
  72.7XX.XXXX.X
  73.7XX.XXXX.X

Coding options also exist for combinations of screw and crimp inserts and terminal block adapters.

Coding bolts of version B
Suitable for the following
contact inserts / multipole adapters:

- ***revos*** BASIC
- ***revos*** POWER
- ***revos*** HD

that are mounted to the housing at the **rear**.
These are mainly multipole adapters that are mounted from the inside of the control cabinet.

Suitable for:

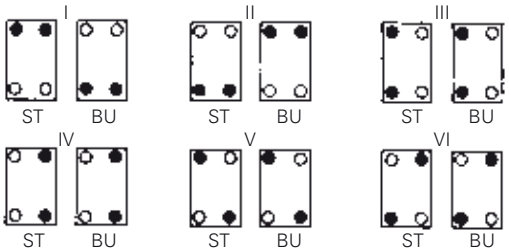
- Combination of screw, crimp, spring-type inserts and clamp adapters in connection with terminal block adapters (mountable from the back of the housing) with part numbers:
  70.9XX.XXXX.X
  72.9XX.XXXX.X
  73.1XX.XXXX.X

Six coding options by means of locking pins

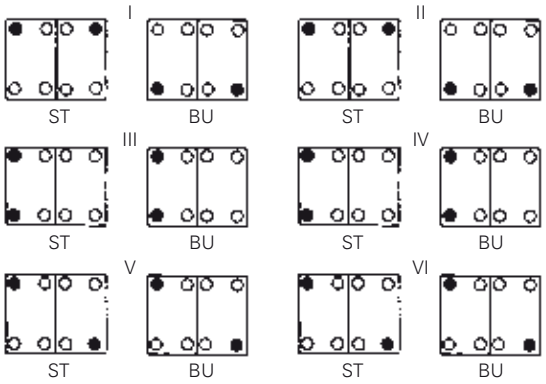
With the use of locking pins, there are a total of six combinations for 3, 6, 10, 16, 24-pin plug connectors

An additional six combinations are possible for the heavy duty connectors with two contact inserts (20, 26, 32 and 48-pin plug connectors).

One contact insert



Two contact inserts



- Coding bolt
- Mounting screws

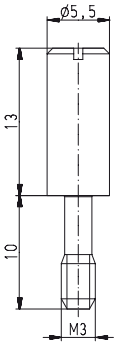
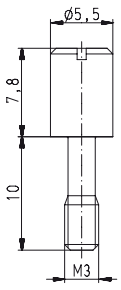
Dimensions

Version A



Version B



Coding options for *revos* multipole connectors

72 coding options by means of coding pin, coding key and coding socket

Part No. for Version A
Suitable for the following contact inserts/ multipole adapters:

revos BASIC, ***revos*** POWER, ***revos*** HD, ***revos*** FLEX, ***revos*** Ex

that are mounted to the housing at the **front**.

Part No. for Version B
Suitable for the following contact inserts/ multipole adapters:

revos BASIC, ***revos*** POWER, ***revos*** HD

that are mounted to the housing at the **rear**.

The use of coding pins and female coding pieces enables 16 different coding options.

With an additional coding bolt up to 72 coding options are possible.

All mounting screws must be replaced by the coding components.

With 15- or 25-pin plug connectors of the series 73.7 … 16 coding options result, because the coding pin cannot be used here.

stainless steel locking levers			
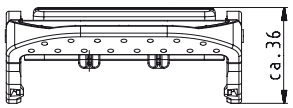
Size 10	BAS AD DC 10 VA	Z7.428.1619.0	10
Size 16	BAS AD DC 16 VA	Z7.428.1719.0	10
Size 24	BAS AD DC 24 VA	Z7.428.1819.0	10

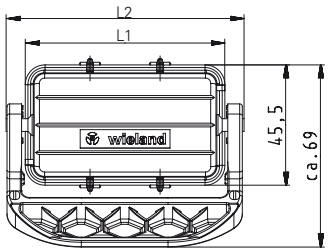
Technical data	
Material/Gasket	Polyamide/NBR
Color	silver gray, RAL 7001
Degree of protection	IP65
Flammability	UL94-V0

Dimensions

Single locking lever with clamp, plastic

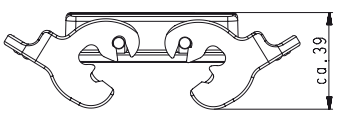
Size	L1 [mm]	L2 [mm]
6	62.5	75
10	75.5	90
16	96	110.5
24	122.5	137

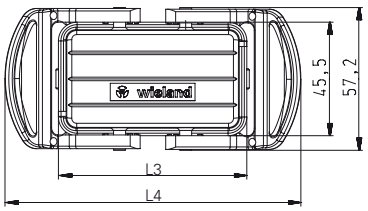




Double locking lever with clamp, plastic

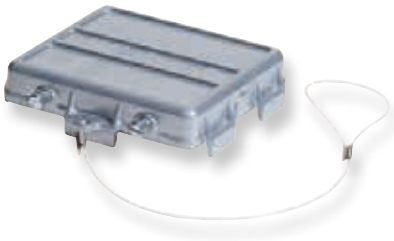
Size	L3 [mm]	L4 [mm]
10	75.5	119
16	96	140
24	122.5	166



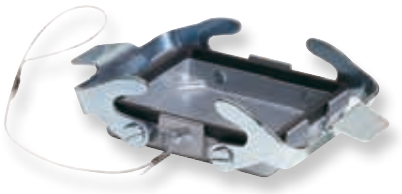


Protective cover for *revos* BASIC Housings Size 32

Protective covers without locking levers, without gasket



Protective covers with locking levers, with gasket



Description	Type	Part No.	P.U.
revos **protective cover with tether cord + loop**			
without locking levers, without gasket			
Size 32	BAS AD DA 32 FS ST	Z7.419.6228.0	10
with locking levers, with gasket			
Size 32	BAS AD DD 32 FS ST	Z7.419.6128.0	10

Technical data	
Material	Die cast aluminum
Surface	Silicon-free
Locking levers	Zinc-plated steel
Gasket	NBR
Degree of protection	IP65

Dimensions

Tools and Accessoires

Crimping tool kit

Description	Type	Part No.	P.U.
Crimping tool for *revos* contacts			
Crimping tool without crimping die and positioner		95.101.0800.0	1
Accessoires for crimping tool			
Crimping die			
Crimping die "A"		05.502.2000.0	1
Crimping die "B"		05.502.2100.0	1
Crimping die "C"		05.502.2200.0	1
Crimping die "D"		05.502.2300.0	1
Crimping die "E"		05.502.2400.0	1
Contact positioner			
Contact positioner 1		05.502.3100.0	1
Contact positioner 2		05.502.3200.0	1
Contact positioner 3		05.502.3300.0	1
Contact positioner 4		05.502.3800.0	1

For assignment of contacts to crimping tool see page 295.

Stripping tool

Description	Type	Part No.	P.U.
Tool			
Stripping tool	0.08 – 10mm²/ 28 – 7 AWG	95.350.0100.0	1

Screwdriver

Description	Type	Part No.	P.U.
Tool			
Screwdriver	Blade 0.6x3.5 form "B"	06.502.4000.0	5

For use with contact inserts and multipole adapters with spring clamp connection

Jumper bar for *revos* BASIC multipole adapters

Description	Type	Part No.	P.U.
Jumper bar for *revos* BASIC multipole adapters			
Insulated jumper bar			
Number of poles			
2-pole		Z7.256.0227.0	10
3-pole		Z7.256.0327.0	10
4-pole		Z7.256.0427.0	10
5-pole		Z7.256.0527.0	10

35	-	7.9	9.2	2	6.87	7.78	9.02		
					[b]	[b] / Class B	[c] / Class I, K, M		

Note: The diameters of the largest rigid and flexible conductors are based on Table 1 in accordance with IEC 60 228A and IEC 30 344 and for AWG conductors on ASTM B 172-71 [4], ICEA Publication S-19-81 [5], ICEA Publication S-66-524 [6], and ICEA Publication S-66-516 [7]

[a] Dimensions only for flexible cables of class 5 in accordance with IEC 60 228A.
[b] Nominal diameter + 5%
[c] Largest diameter for each of the three classes I, K, M, + 5%

Theoretical diameter of the largest conductor and relationship between rated cross section and connectable conductors

Table 2: (EN 60 999-2: 2003): Relationship between rated cross section and diameter of the conductors

Rated cross section	Theoretical diameter of the largest conductor		Connectable conductor	
	Metric			
	Rigid	Flexible [a]	Rigid	Flexible
	Multistrand			
mm^2	mm	mm		
50	9.1	11.0		
70	11.0	13.1		
95	12.9	15.1		
-	-	-	Must be set in the relevant product standard	
120	14.5	17.0		
150	16.2	19.0		
185	18.0	21.0		
-	-	-		
240	20.6	24.0		
300	23.1	27.0		

Note: The diameters of the largest rigid and flexible conductors are based on Table 1 and Table 3 of IEC 60 228A.

[a] Dimensions only for flexible conductors of class 5 in accordance with IEC 60 228A.

Current load capacity of cables or lines

Recommended values for current load capacity of cables or lines for fixed installation and open-air installation should be taken from DIN VDE 0298 Part4/08.2003

Current load capacity

Current load capacity of terminal blocks
(for terminal blocks) For copper conductors, the following tables apply:
Test current in accordance with DIN EN 60 947-7-1/VDE 0611 Part: 07.2003

Table 4: Value of the test current for heating, aging and voltage drop test for metric conductor sizes

Rated cross section mm²	0.2	0.34	0.5	0.75	1	1.5	2.5	4	6	10	16
Test current A	4	5	6	9	13.5	17.5	24	32	41	57	76

Rated cross section mm²	25	35	50	70	95	120	150	185	240	300
Test current A	101	125	150	192	232	269	309	353	415	520

The rated cross section of a terminal block is the manufacturer-specified value of the connectable conductor cross section to which specific thermal, mechanical and electrical requirements refer.

The rated connection capacity of a terminal block is a range and/or number of rated cross sections that the terminal block is intended for; it is specified individually for each terminal. The conductors can be rigid (solid or multistranded) or flexible. The specifications refer to unprepared conductor ends without ferrules and comprise the largest and smallest connectable conductor cross section. In general, two conductors of the same cross section and structure can be connected.

For terminal blocks with additional function, the rated current is established by the manufacturer according to the requirements of the additional function. Additional functions can be given by plug connections, disconnection points, fuses, relays or electronic components. The current load capacity of other terminals is established and evaluated based on the above determinations or in accordance with EN 60 999/VDE 0609 Part 1 or EN 60 998-1/VDE 0613 Part 1 or EN 60 335-1/DIN VDE 0700 Part 1, if applicable.

The current load capacity for plug connectors is determined and established based on DIN EN 61 984/VDE 0627: 09.2002 and

DIN EN 175 301-801: 09.2000, if applicable. The revos plug connectors must not be manipulated when under load.

Tightening torque

Tightening torque of screw connections

Extract from EN 60 947-1

Tightening torque for proving the mechanical tightness of screw connections

Table 4: Tightening torques for proving the mechanical tightness of screw connections/terminals

Thread diameter		Tightening torque (Nm)		
Metric standard values	Diameter range	I	II	III
1.6	1.6	0.05	0.1	0.1
2.0	1.6 to 2.0	0.1	0.2	0.2
2.5	2.0 to 2.8	0.2	0.4	0.4
3.0	2.8 to 3.0	0.25	0.5	0.5

5	4.7 to 5.3	0.8	2.0	2.0
6	5.3 to 6.0	1.2	2.5	3.0
8	6.0 to 8.0	2.5	3.5	6.0
10	8.0 to 10.0	-	4.0	10.0
12	10 to 12	-	-	14.0
14	12 to 15	-	-	19.0
16	15 to 20	-	-	25.0
20	20 to 24	-	-	36.0
24	24	-	-	50.0

Column I: Applies for screws without heads that do not protrude from the thread hole and for screws that can only be tightened with screwdrivers with an edge narrower than the screw's thread core diameter.

Column II: Applies for nuts and screws that are tightened with screwdrivers.

Column III: Applies for nuts and screws that can be tightened with tools other than screwdrivers.

Explanations of applications in hazardous areas

revos ⟨Ex⟩-multipole connectors are designed for special applications in hazardous areas. Their use in zone 0 for intrinsic circuits has been approved by the DEKRA EXAM test institute. The housings for the multipole connectors are manufactured from die cast zinc alloy.

Operating instructions for the connector series „revos Ex…“

A pluggable connection consists of a hood, a base as well as a female and male insert.

Installation of a pluggable connection must be prepared as follows:

– Closed bottom housings must be fixed with screws to a flat surface using the available bore holes.
– Open-bottom housings must be fixed with screws to a flat surface using the available bore holes. Before fixing the housing to the surface, ensure that the seal fixed to the base at the time of delivery is mounted correctly.
– The female insert and male insert must be screwed into the hood (or alternatively screwed into the base) using the screws already attached to the frame of the male or female connector.
– The cables are connected to the male connectors and female connectors using the screw connection with a torque of 0.5 Nm.

The components are made ready for operation by plugging the hood and base together and latching them.

The relevant connectors must be mounted to device in a way that at least protection degree IP 54 according to EN 60529 is ensured.

The „revos Ex“ connectors are designed for use in an ambient temperature range at installation site of –20°C bis +60°C.

Usage note:
The “revos Ex” plug connector series can be used with a rated voltage of 90 V and a permissible cable cross-section of 0.5 mm2 to 2.5 mm^2 for the following application areas according to ATEX directive 94/9/EC and the EN 60079-0:2006, EN 60079-11:2007 and EN 50303:2000 standards:

⟨Ex⟩ **I M1 Ex ia I**

Proof is provided by the marking of the Ex area on the individual components of the connector.

Permissible conductor cross section: 1.5 mm^2 to	2.5 mm^2	to	16 A
	1.0 mm^2	to	10 A
	0.75 mm^2	to	6 A
	0.5 mm^2	to	3 A

2. Nachtrag

(Ergänzung gemäß Richtlinie 94/9/EG Anhang III Ziffer 6)

zur EG-Baumusterprüfbescheinigung
BVS 03 ATEX E 184 X

Gerät: Steckverbinderserie revos Typ Ex**

Hersteller: Wieland Electric GmbH

Anschrift: 96052 Bamberg

Beschreibung

Der Grund für die Ausstellung dieses Nachtrages ist die Bestätigung der Übereinstimmung dieses Gerätes mit dem Normenstand der EN 60079-0:2006, EN 60079-11:2007 und EN 50303:2000, sowie die Änderung der Gerätekategorie auf M1.

Bei der Steckverbinderserie revos Typ Ex** in 6-, 10-, 16-, 24-, und 48-poliger Ausführung handelt es sich um Rechteck-Steckverbinder in Schraubanschlusstechnik mit einem Bemessungsanschlussvermögen von 0,5 – 2,5mm² , die ein Anschließen und Verbinden von ein- bzw. feindrähtigen Leitern ermöglicht. Die Gehäuseober- und -unterteile sind wahlweise sowohl mit Einhandverriegelung als auch mit Zweihandverriegelung ausgeführt und je nach Verwendung zum Geräteanbau, -einbau oder als freie Kabelverbindung einsetzbar.

Der Steckverbinder enthält nur Bauteile, die die Zündschutzart Eigensicherheit nicht beeinträchtigen. Aufgrund der Bauart sind die unterschiedlichen eigensicheren Stromkreise untereinander bis zu einer Summe der Scheitelwerte der Bemessungsspannungen von 90 V sicher getrennt.

Die grundlegenden Sicherheits- und Gesundheitsanforderungen der geänderten Ausführung werden erfüllt durch Übereinstimmung mit:

EN 60079-0:2006 Allgemeine Anforderungen
EN 60079-11:2007 Eigensicherheit 'i'
EN 50303:2000 M1 Betriebsmittel

Die Kennzeichnung des Gerätes muss die folgenden Angaben enthalten:

Selection criteria and characteristics of the different contact platings tin, silver and gold

Contact platings

The core of an electric plug connection is the contact pair, consisting of the socket and plug contacts. Contacts are produced almost exclusively from copper alloys, and Wieland Electric GmbH uses contact platings made of tin, silver and gold, depending on the product specification:

Tin is corrosion-resistant; silver offers favorable conditions at high current and with cyclical switching processes; gold offers protection against aggressive environmental conditions.

Tin-plated

- ***revos*** – 16 A plug connector in screw and crimp design are available in all three surface platings, tin, silver and gold.

Silver-plated

- ***revos*** – 16 A plug connectors with spring clamp contacts are available with silver-plating
- ***revos*** – 16 A multipole adapters are normally available tin-plated.
- ***revos*** – hybrid plug connectors are normally supplied in a tin version for I ≤ 16 A in and in a silver-plated version for I > 16 A.

Gold-plated

Inserts with tin-plated contacts:

Offers excellent resistance to the corrosive gases SO_2 and H_2S. Tin-plated contacts are especially well suited for transmitting low voltages and current in the millivolt and µA range, but also for typical signal voltages, such as 24 V and lower ampere, or network voltage and corresponding current.

Inserts connectors with silver-plated contacts:

Silver-plated contacts extend the operating life of the plug connector when there is strong current, in particular with cyclical motor start-up current that is markedly above the nominal current of the plug connectors. For example, in use on plastic injection molding machines that switch current on and off within seconds. Silver-plated contacts have proven themselves when the maximum current load capacity limit of 16 A was almost surpassed. Here, too, longer life cycles can be achieved.

In the range of high contact temperatures (> 100 °C), silver-plated contacts are preferable to tin-plated contacts.

Aging of silver contacts due to the influence of industrial atmospheres.

During the lifetime of the silver contacts, a silver sulfide layer can form due to the increased affinity of silver for sulfur, which is present in industrial atmospheres in small amounts. Through the chemical reaction of the silver with the gaseous sulfur in the surrounding air, brown to black layers arise, which result in coloring of the surface.

The chemical reaction of the silver surfaces on the plug systems of Wieland Electric GmbH can be delayed by passivating the silver-plated surfaces at the factory with an additional layer. This passivation protects the silver temporarily from a reaction with the gaseous sulfur in the surrounding air. Every currently known passivation layer will protect the silver surface for a limited time only, and a silver sulfide layer, including a black-brown coloration, will form.

This soft layer is extremely thin and is broken through when the contacts are mated. As a result, low transmission resistance is assured, even for colored contacts. This has been proven in numerous examinations in our laboratory.

Inserts connectors with gold-plated contacts:

In areas where high signal precision is required and the signals are transmitted through extremely small current and low voltage, signal distortions can occur with silver contacts with a silver sulfide layer. To simplify, the following values can be used: For current < 5 mA and voltages up to 5 V, tin-plated or gold-plated contacts are recommended.

But for extreme applications, only gold-plated contacts should be used.

Conclusion:

Fundamentally, tin-plated contacts are very good or better suited than silver-plated contacts for all types of signal current. For stronger current, when used with high ambient temperatures or a cyclical electric current, longer service lives can be expected with silver-plated contacts. Gold-plated contacts should be used in the range of very low voltage and current.

Wieland has decades of experience in the area of pluggable connection technology. We offer the best-possible contact with the optimal plating for every application.

Definition of the IP degrees of protection

For applications in industrial environments, degrees of protections and standards were defined that specify the environmental impact regarding contact, protection against foreign bodies and humidity to which a system can be exposed without being damaged. The degrees of protection are defined in the IP standard of DIN EN 60 529: degrees of protection achieved through housings (IP code).

The IP code consists of a two-digit number that indicates the relevant protection degree. The first digit specifies the protection degree for the protection against contact and foreign bodies while the second digit specifies the protection against water and humidity.

Practical notes:

For "normal" industrial systems where multipole connectors are used in closed factory halls, protection according to IP54 is normally offered = protected against dust + protected against splashing water. This protection is normally completely sufficient. For systems in outdoor applications (vehicles, snow guns, etc.) we recommend protection according to IP65 = dustproof + protected against jets of water. A protection according to IP67 or IP68 is required for only a few outdoor applications unless a continuous immersion of the components cannot be avoided.

The following tables are to describe the protection degrees in detail:

Table 1: Protection against contact and foreign bodies

1st	Protection against accidental contact	Protection against foreign bodies
0	No protection	No protection
1	Protection against contact with large parts of the body, for example the back of the hand	Protection against foreign bodies with a diameter of 50 mm and larger.
2	Protection against contact with the finger of 12.5 mm and larger.	Protection against foreign bodies with a diameter of 12.5 mm and larger.
3	Protection against contact with tools and wires larger than 2.5 mm	Protection against foreign bodies with a diameter of 2.5 mm and larger.
4	Protection against contact with tools and wires larger than 1 mm	Protection against foreign bodies with a diameter of 1 mm and larger.
5	Complete protection against accidental contact	Protection against dust: Penetration of dust is not fully prevented, but dust must not penetrate to such an extent that the equipment's functionality or safety is restricted in any way
6	Complete protection against accidental contact	Dustproof: No penetration of dust possible with a negative pressure of 20 mbar.

Definition of the IP degrees of protection

Table 2: Water protection

2nd	Protection against ingress of water
0	No protection
1	Protection against dripping water: Dripping water falling vertically must not have a damaging effect
2	Protection against dripping water up to a tilt of 15°: Dripping water falling vertically must not have a damaging effect, if the equipment is tilted by up to 15°.
3	Protection against spraying water: Water that is sprayed in an angle of up to 60° must not have any damaging effect
4	Protection against splashing water: Water spraying from all directions towards the equipment must not have any damaging effect
5	Protection from jets of water: Jets of water directed towards the equipment from all directions must not have any damaging effect
6	Protection from powerful jets of water: Powerful jets of water that are directed towards the housing from all directions must not have any damaging effect.
7	Protection from temporary immersion in water: Water must not ingress in a quantity that has a damaging effect, if the housing is temporarily immersed in water under standardized pressure and time conditions
8	Protection from continuous immersion in water: Water must not ingress in a quantity that has a damaging effect, if the housing is continuously immersed in water under conditions agreed upon between the manufacturer and the user. The conditions must however be more severe than for key figure 7.
9 K	Protected against ingress of water from all directions, even with highly increased pressure against the housing. (High-pressure/steam jet cleaner, 80–100 bar)

Definition of the IP degrees of protection

Degrees of protection against water, designated by the second index number

The second index number defines the level of protection provided by the housing against damaging influences on the equipment resulting from the intrusion of water.

Table 3 gives short descriptions and definitions for the degrees of protection defined by the second index number.

Degrees of protection listed in this table may only be determined using the second index number and not through reference to the brief description or definition.

Up to the second index number 6, the description means that the requirements for all lower index numbers are also fulfilled.

A housing designated with just the second index number 7 or 8 is considered unsuitable for exposure to jet-spray water (designated with the second index number 5 or 6) and does not need to meet the requirements of index numbers 5 or 6, unless equipped with a double designation according to the following table:

Table 3: Degrees of protection

The housing meets the test for			
jet-spray water, second index number	Temporary/permanent submersion second index number	Description and label	Area of application
5	7	IPX5 / IPX7	Multipurpose
6	7	IPX6 / IPX7	Multipurpose
5	8	IPX5 / IPX8	Multipurpose
6	8	IPX6 / IPX8	Multipurpose
	7	IPX7	Restricted
	8	IPX8	Restricted

Housings for **"multipurpose"** use, as specified in the last column, must meet the requirements, both when exposed to jet-spray water or when temporarily or permanently submerged.

Housings for **"restricted"** use, as specified in the last column, are considered suitable only for temporary or permanent submersion and unsuitable for exposure to jet-spray water.

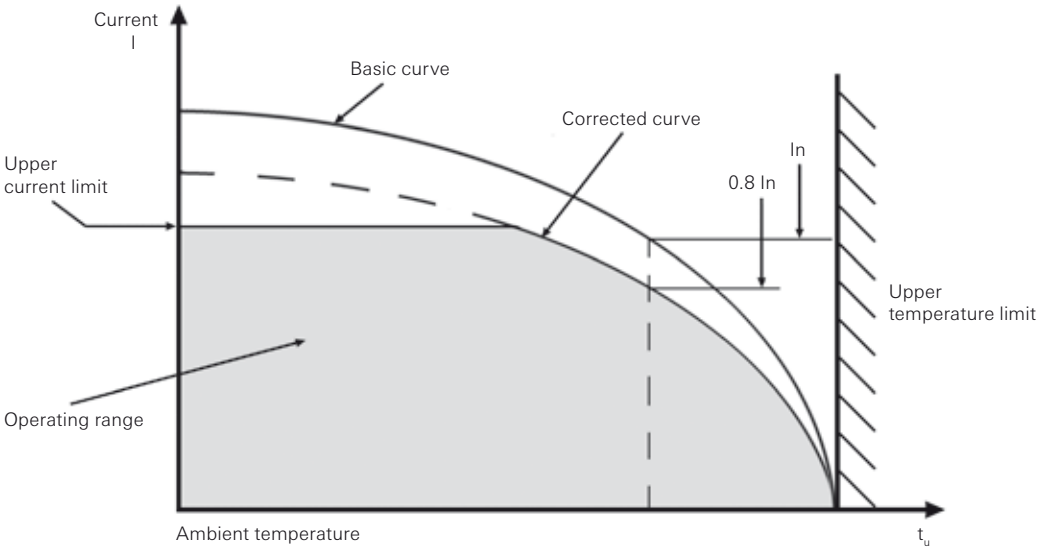
Derating behavior of *revos* industrial multipole connectors

Like any other connector, the ***revos*** industrial multipole connector also faces a reduction in the values for the current carrying capability when the ambient temperature rises.

This behavior is called derating behavior. Basic information on the derating behavior of connectors is provided in standard DIN EN 60 512 sec. 3.

Each contact insert is characterized by its rated current, among other things. The rated current is the current that a connector can carry in an ambient temperature of 40°C, simultaneously continued (not intermittent) over all contacts without exceeding the permissible upper temperature limit.

The derating curve shows the maximum current I at the given ambient temperature without the connector exceeding the upper temperature limit.



Curve of current carrying capability derived from the basic curve Source DIN EN 60 512-5-2-2002

Information on how to change over from PG to metric threads

Basic legal conditions

The European standard EN 50 262 “Metric Cable Glands for Electrical Installation” was ratified on April 01, 1989 by CENELEC (European Committee for Electrotechnical Standardization) and put into force.

Basic legal conditions

The big difference in the new EN standard is it has the character of a safety standard.
As a building standard it only defines the metric thread and its lead.

PG threads are available on request!

Industrial technology

Solutions for the control cabinet

- DIN rail terminal blocks
  - Screw, tension spring or push-in connection technology
  - Wire cross sections up to 240 mm²
  - Numerous special functions
  - Software solutions interfacing to CAE systems
- Safety
  - Safe signal acquisition
  - Safety switching devices
  - Modular safety modules
  - Compact safety controllers
  - Application consulting and training
- Network engineering and fieldbus systems
  - Remote maintenance via VPN industrial router and VPN service portal
  - Industrial Ethernet switches
  - PLC and I/O systems, standard and increased environmental conditions
- Interface
  - Power supply units
  - Overvoltage protection
  - Coupling relays, semiconductor switches
  - Timer relays, measuring and monitoring relays
  - Analog coupling and converter modules
  - Passive interfaces

Solutions for field applications

- Decentralized installation and automation technology
  - Electrical installation for wind tower
  - Fieldbus interfaces and motor starters
- Connectors for industrial applications
  - Rectangular and round connectors
  - Aluminum or plastic housings
  - Degree of protection up to IP68
  - Current-carrying capacity up to 100 A
  - Connectors for hazardous areas
  - Modular, application-specific technology

PC board terminals and connectors

- Screw or spring clamp connection technology
- Spacings: 3.5 mm to 10.16 mm
- Reflow or wave soldering process

Building and installation technology

- Building installation systems
  - Main power supply connectors IP20/IP65 ... IP68
  - Bus connectors
  - Low-voltage connectors
  - Power distribution system with flat cables
  - Distribution systems
  - Bus systems in KNX, LON and radio technology
  - DIN rail terminal blocks for electrical installations
  - Overvoltage protection

contacts are green.
