

Linear/Saturating Choke

See below:

Approvals and Compliances

Description

- Linear/saturating choke
- THT-terminals
- Low noise development by using iron powder toroids instead of conventional iron lamination cores
- Flange for mounting onto printed circuit board
- Fully potted resign

- Phase angle control circuits with thyristors, triacs or transistors
- The choke acts at its optimum when it is mounted directly at the interference originator (thyristor, triac)
